WERZALIT terrace floors are high-quality outdoor terrace floors. The form and materials are the result of a long-term development and enhancement. WERZALIT terrace flooring is manufactured from the weather-resistant S2 wood-polymer composite (WPC) that combines the best properties of wood and plastic. Only superior materials are processed with great care.

The polymers employed are exclusively industrially produced raw materials specially manufactured for this purpose, possessing clearly defined characteristics. Recycled plastic materials and PVC are not used.

For the wooden proportion in the S2 wood-polymer composite only healthy thinning material from forests is employed. In Germany the timber originates from woodlands in the near periphery of the production facilities, from forestry companies certified in accordance with PEFC. WERZALIT itself is also certified in accordance with PEFC. All WERZALIT terrace floors are dye penetrated and UV-protected.

The WERZALIT warranty applies to the object defined below/the delivery defined below and is only valid in connection with the invoice or the purchase agreement.

WERZALIT assumes the warranty for the effectiveness of the WERZALIT terrace floors for a period of five years from the date of purchase with regard to the following characteristics:

- ✓ **Unrestricted functionality**
- ✓ **No splintering**
- ✓ **No rotting caused by wood disintegrating fungi**
- ✓ **No destruction caused by insects**

If any of these specified characteristics should prove to be ineffective during these five years, WERZALIT shall agree, at its discretion, to a replacement delivery, rectification of defects or to the reimbursement of the purchase price paid by the customer for the relevant WERZALIT terrace floors, which exhibit defects.

This obligation presupposes the appropriate installation on adherence to the pertinent guidelines which are relevant at the time of purchase (installation instructions) from WERZALIT and the proper treatment of the products we have supplied. Claims presented in relation to this warranty must be submitted in writing to WERZALIT within a period of five years from the date of invoice or, if no invoice was issued, within five years from the date of the written purchase agreement, giving reasons for the complaint. For the processing of claims the employees assigned by WERZALIT must be granted prompt access to the object for which the complaint has been submitted.

As described above WERZALIT terrace floors are dye penetrated with highly light-resistant pigments (light fastness level 8, EN ISO 105-B02) and UV-protected. As these products are based on wood, colour deviations in the course of time due to UV-radiation and humidity are to be anticipated. Especially during the initial weeks and months a considerable lightening of the flooring can occur according to the weather conditions. These colour differences between the terrace floors do not represent defects.

Any services provided under this warranty shall not extend the original warranty period.

The sole place of jurisdiction for all claims submitted by merchants arising from this warranty is Stuttgart.
