

Portable electronic therm.

Technical data

Display:	3 ½ digits (1999) LCD. Height 17 mm.
Measure range:	-50°C ... + 500°C.
Resolution:	0,1°C up to 199°C. 1°C onwards.
Accuracy:	±2°C from -50°C up to 400°C. (this error does not include the added by the probe).
Power supply:	Battery 9V.
Weight:	120 grams.
Dimensions:	115x70x28 mm. Includes a padded cloth holster, battery and operating instructions.
Signal input:	Thermocouple "K" type standard connection.
Features:	- Auto switch-off after 30 minutes. - °C / °F converter.

Probe TP-02: Immersion / penetration probe (K type thermocouple) in stainless steel. Dimensions: 100x3 mm. Spike ended, with handle and one metre of PVC flexible cord, ended in a mini connector. Measure range: -40°C+400°C. Suitable to measure aire temperature, soft solids, dust and liquids.

Probe TP-04 Contact probe (K type thermocouple) in stainless steel. Dimensions: 150x6 mm. strip ended, with handle and one metre of PVC flexible cord, ended in a mini connector. Measure range: -40°C a +500°C. Suitable to measure temperature on flat surfaces.
