

MAGNETIC TOOLS

MAGNETIC V BLOCK

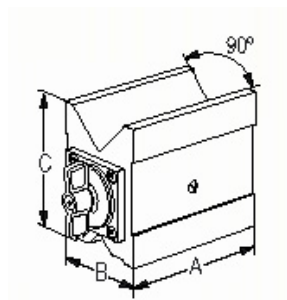

This block has 3 magnetic faces, 2 of which form a 90° "V". It is very useful for holding unevenly shaped and cylindrical pieces.

It is completely watertight and suitable for spark-erosion machines. Soft magnetization by a lever.

They can be supplied in pairs. Ømin. / Ømáx.: 15 / 64 mm

Precision of \perp , V: ± 0,02/100 mm

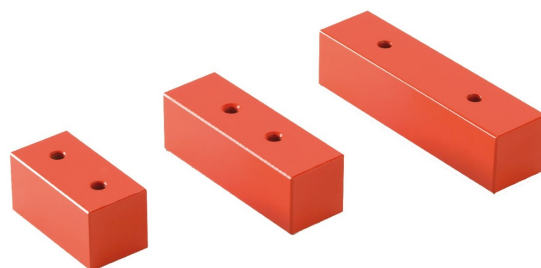

CODE	A mm	B mm	C mm	FORCE daN	WEIGHT Kg
14.10.004	106	68	95	250 daN	4,2

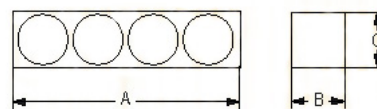

MAGNETIC RECTANGLES

They contain neodymium magnets.

Max. Temperature: 60 ° C

CODE	A mm	B mm	C mm	FIXING HOLES	FORCE daN	WEIGHT Kg
24.00.002	50	25	25	2 x M-6	12	0,22
24.00.003	75	25	25	2 x M-6	18	0,32
24.00.004	100	25	25	2 x M-6	24	0,42

BLOCKS WITH THREE MAGNETIC SIDES

This block is permanently magnetic and has three magnetic sides to hold unevenly shaped pieces.

The bottom side can be fixed to a magnetic or electromagnetic chuck.

CODE	A mm	B mm	C mm	WEIGHT Kg
22.01.004	100	30	30	0,7
22.01.003	100	50	50	1,8
