

# Ishtar LED

Design Philippe STÉPHANT

The ISHTAR LED lamp stands out by its functional design and advanced technology in the service of ergonomics and performance. The arm comes in straight, clean lines, and has three articulations, with a friction adjustment device and an integrated return spring for ease of handling and a very comfortable amplitude.

The tapered lighting unit can be adjusted vertically, and rotated through 360°. It comes with a 6-W LED light source (400 lumens, 3,000 K), and provides excellent light distribution over the work surface. Lighting unit and arm in steel, joints in die-cast aluminium. Weighted base in steel and ABS, integrated driver.
